TESTIMONIAL

Rupa was an asset to our organization when it came to addressing our multitude of software issues and deployment of new applications within our environment. She clearly and efficiently communicated with her engineering team and our leadership team to implement all necessary custom applications we required and in a timely manner.

She is highly respected by her colleagues and subordinates and skillfully managed the plethora of personalities involved with our projects. Her enthusiastic, optimistic attitude is contagious and serves to motivate and energize her project staff.

Rupa showed an uncanny ability to foresee a potential problem resulting in cost savings and preventing unexpected hurdles from delaying our ability to get contracts and reports out to our clients in a timely manner. She quickly picked up our workflow and unique needs using the system and was able to convey that to her team to save time and money.
